Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3731

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lawton GmbH (DE 3219260). Lawton GmbH discloses a scissors comprising two branches each of which has a cutting section 7 and handle section and a metal member 12 which has a thickness within the claimed range (at least near the cutting edge where the thickness is small). Lawton GmbH fails to describe the metal member 12 as a "foil". However, it would have been obvious that it is a foil since it is very thin. As to claims 23 and 24, Lawton GmbH fails to disclose teeth at the cutting edges. However, it is old and well known in this art to include teeth or serrations in the cutting edges of blade in order to obtain the advantage of improving the cutting action. It would have been obvious to make the cutting edges of Lawton GmbH serrated so that it too would have this advantage. As to claim 15, for example, Lawton GmbH fails to disclose the specific attachment means between the metal foil and branch.

Art Unit: 3731

However, it is old and well known in this art to use the claimed attachment means in order to obtain the advantage of providing a secure and strong connection between the parts. It would have been obvious to use the claimed attachment means in the Lawton GmbH device so that it too would have this advantage.
